

AirScout

A measuring device developed
by students

- Flexible and inexpensive device
- Measurements of air quality parameters

- It helps to recognise pollution caused by traffic
- Provides important data to help the environment

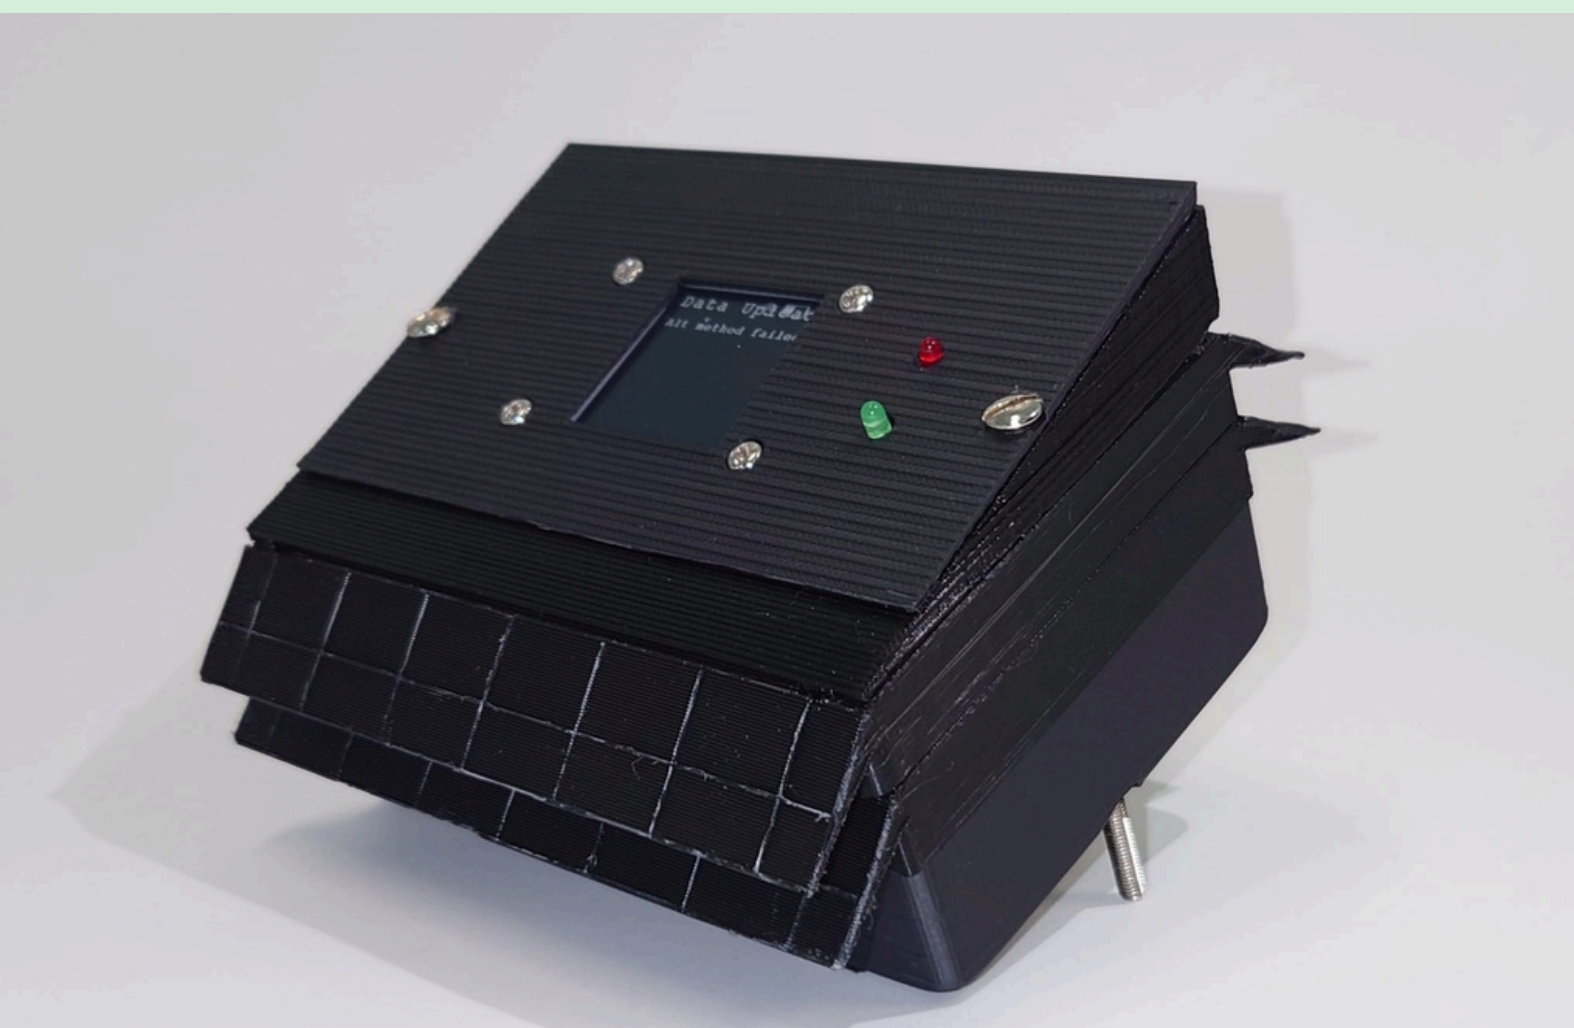

Co-funded by
the European Union

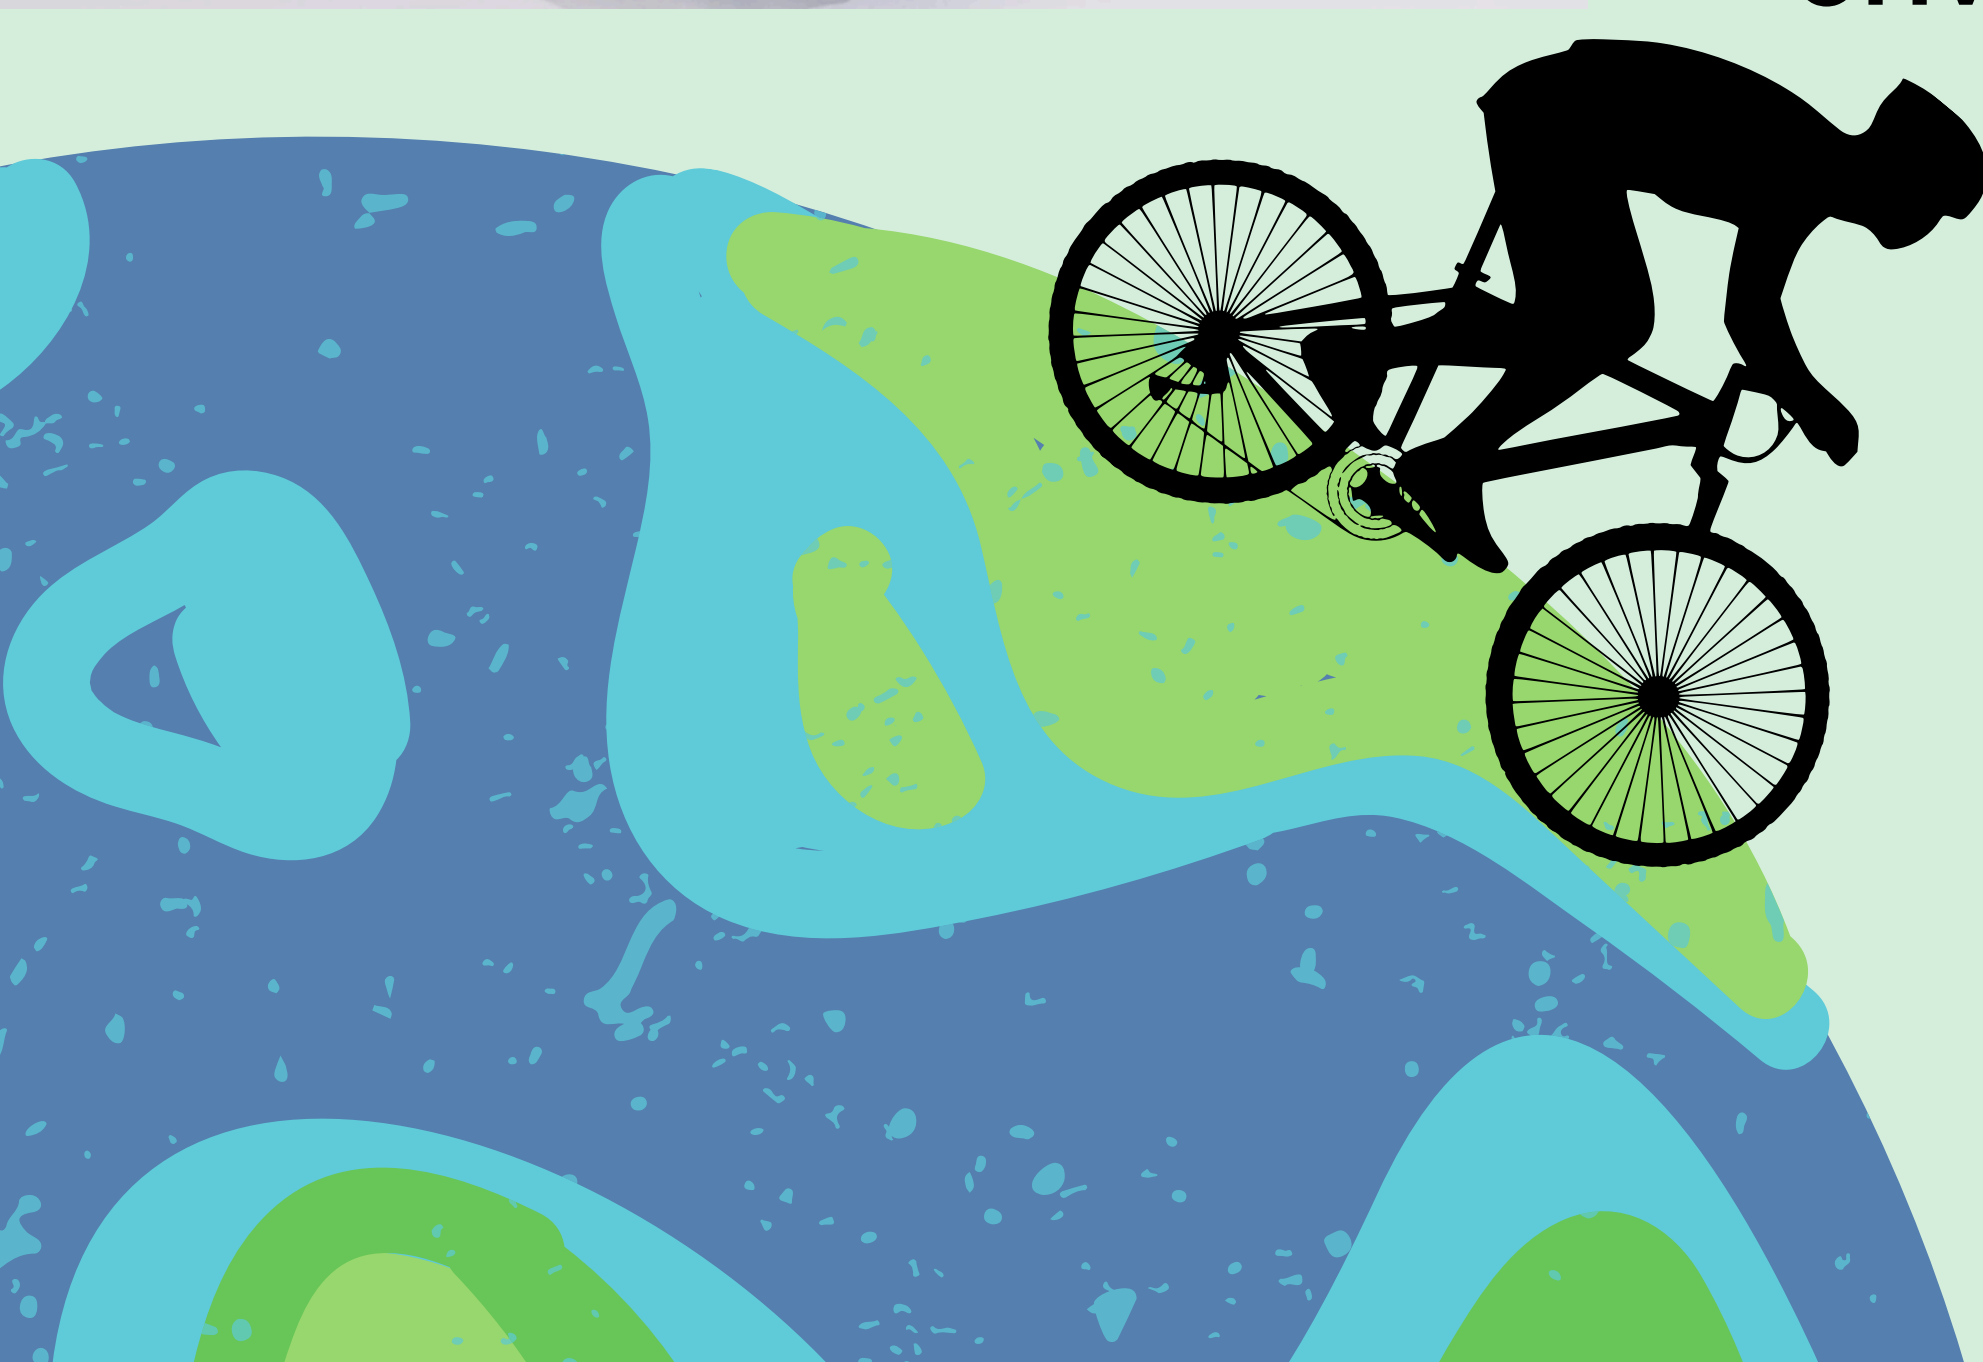

AirScout

Von Schülern entwickeltes
Messgerät

- Flexibles und kostengünstiges Gerät
- Messung von Luftqualitätsparametern

- Hilft die durch den Verkehr verursachte Verschmutzungen zu erkennen
- Liefert wichtige Daten für den Umweltschutz

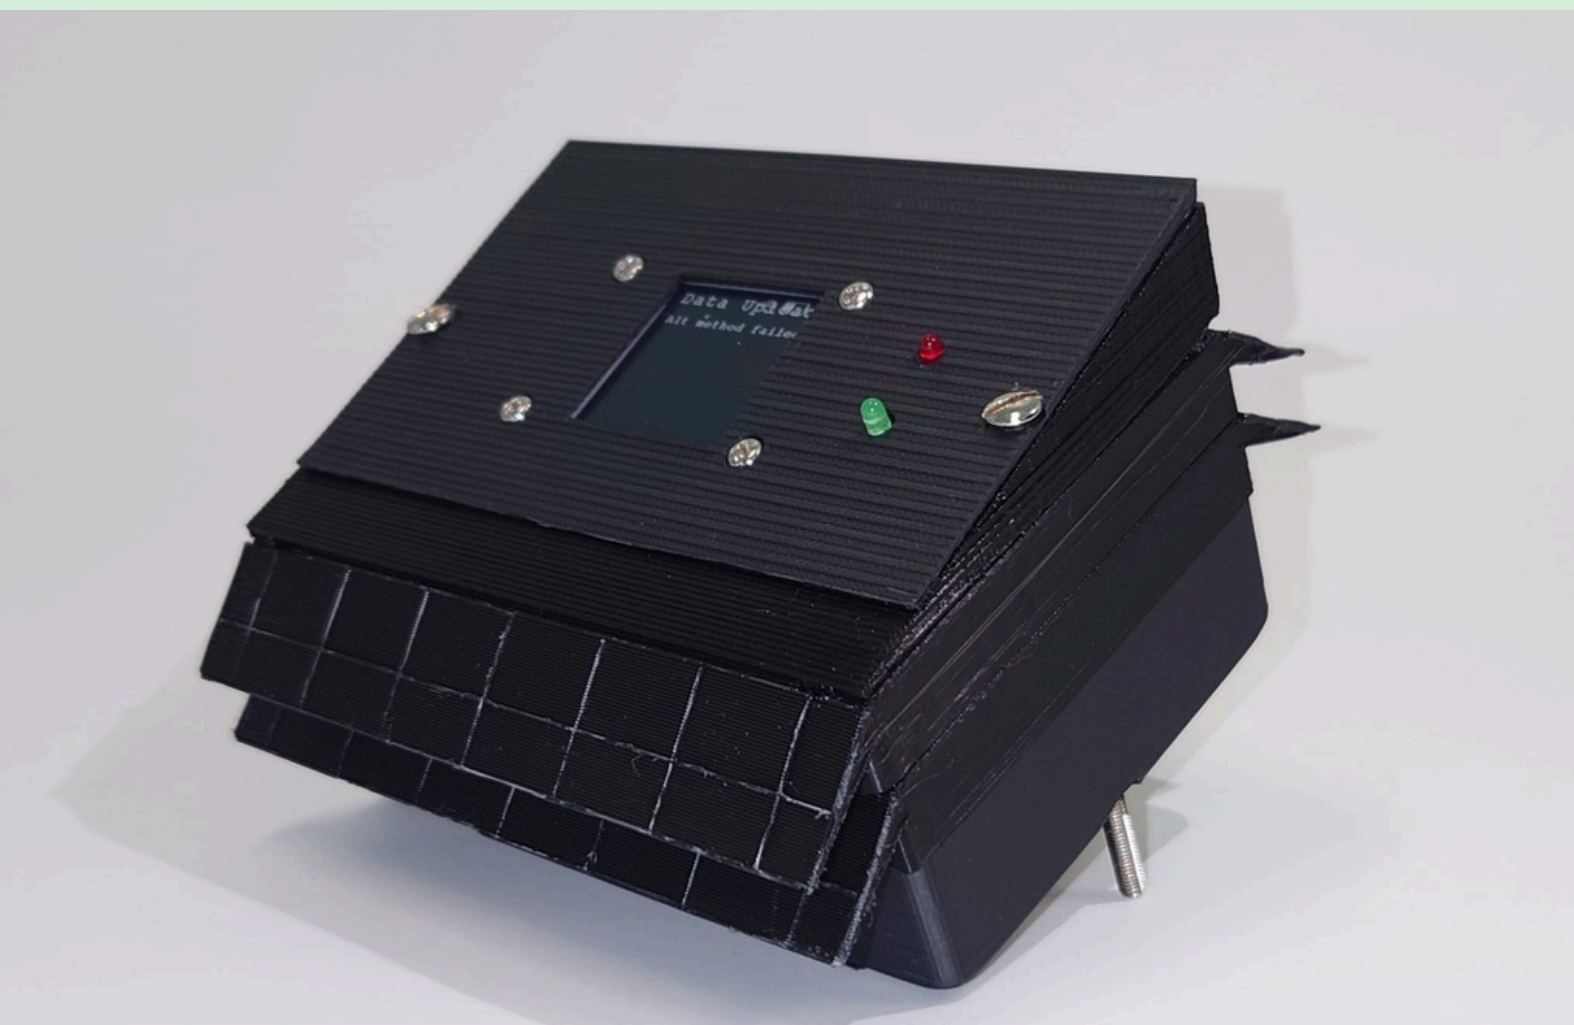

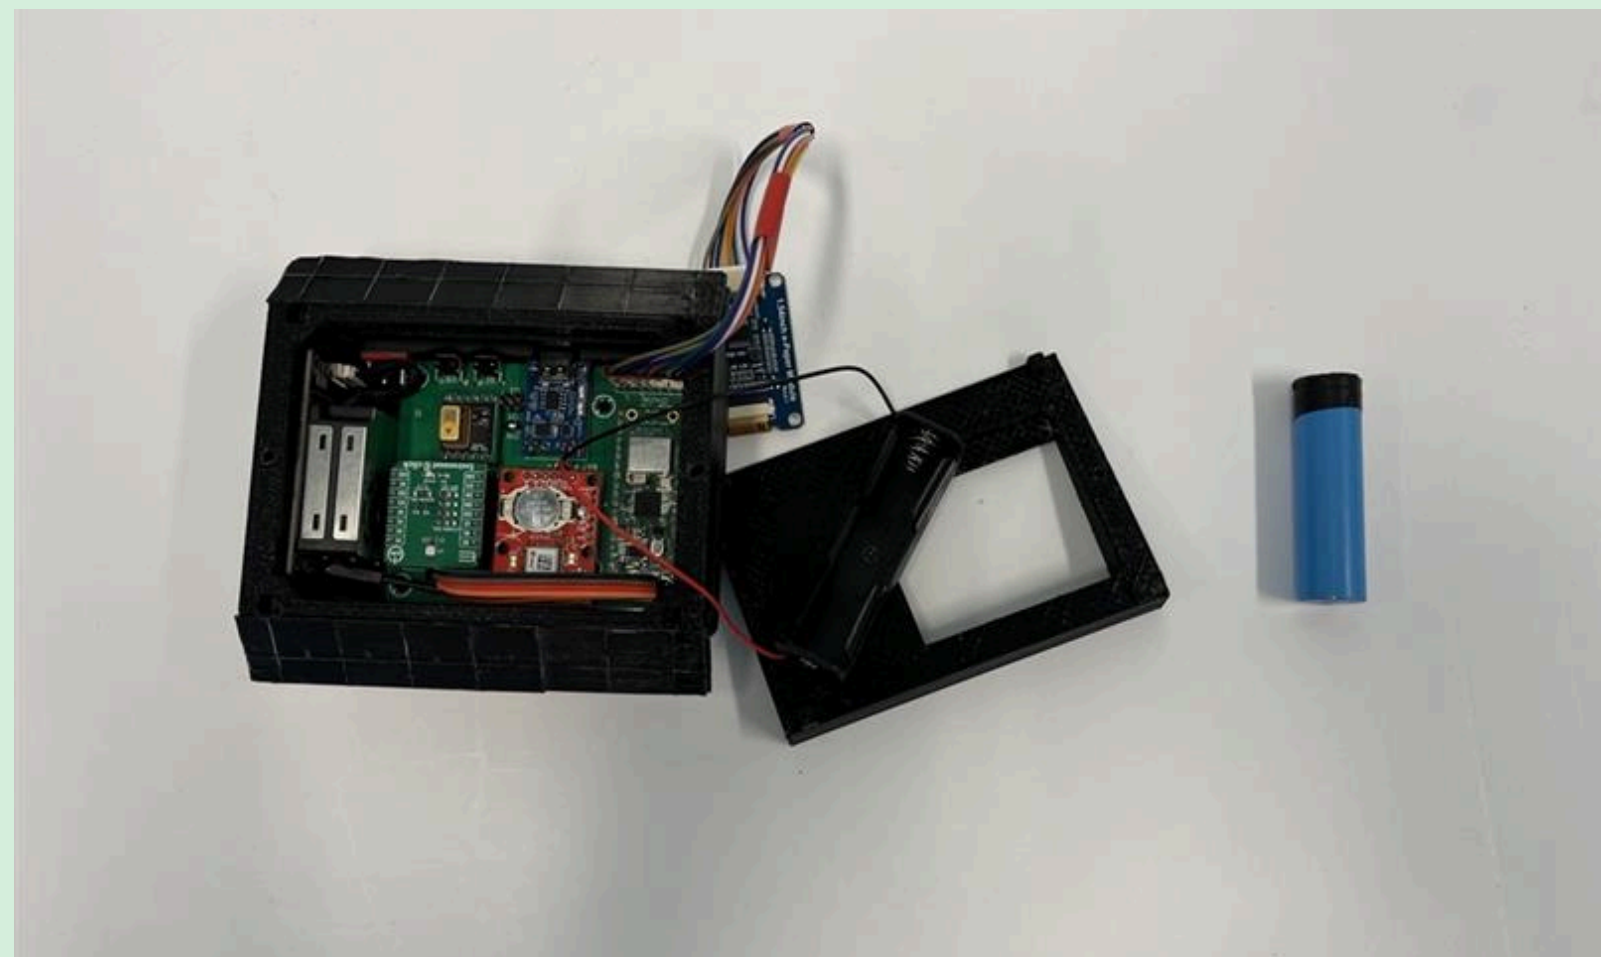

Co-funded by
the European Union

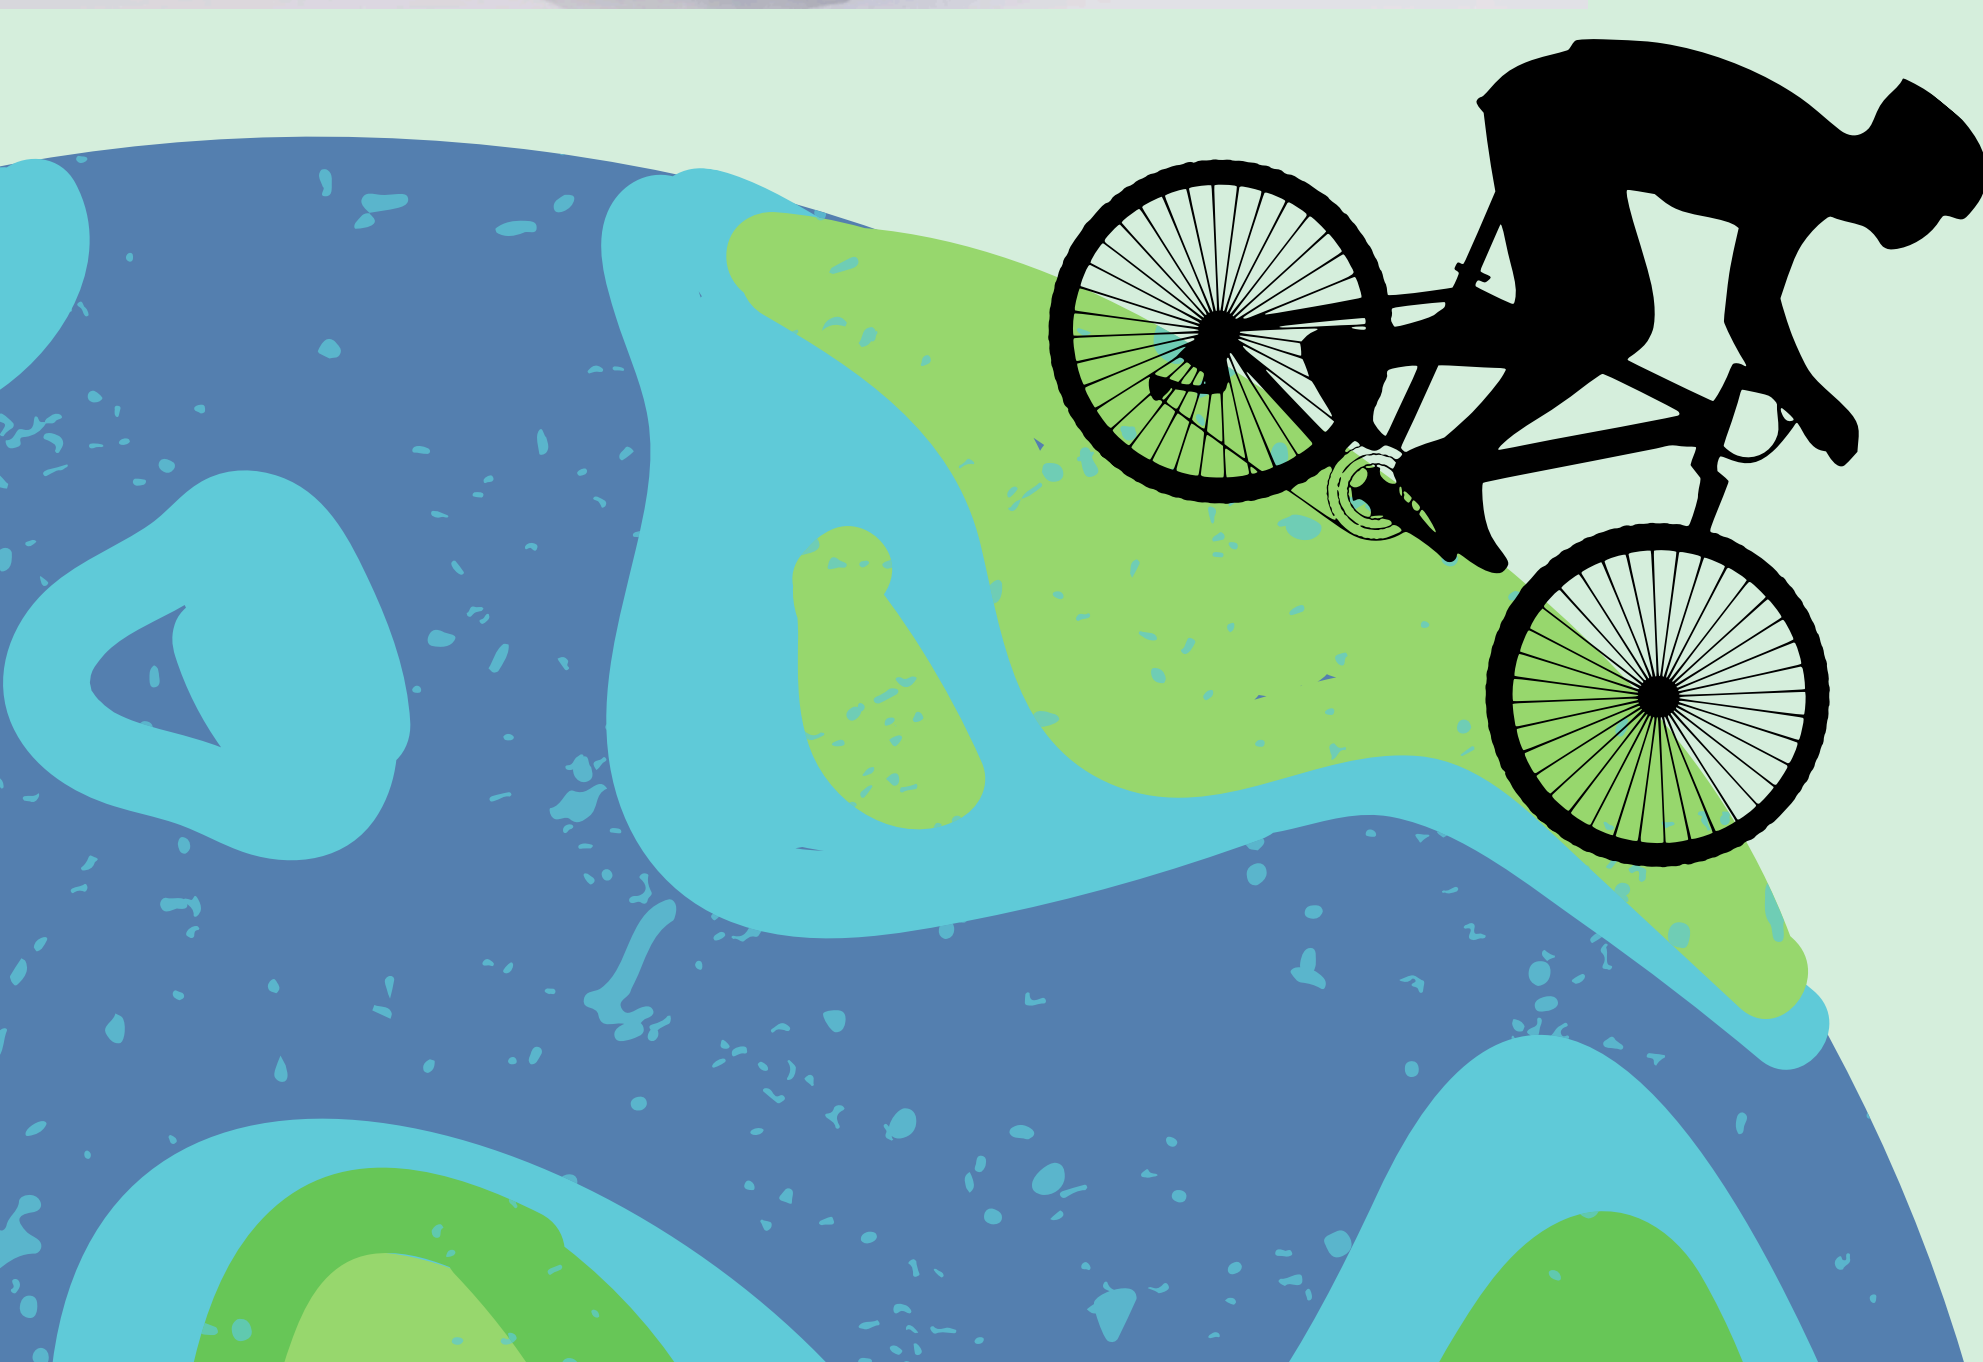

AirScout

Dispositivo de medición desarrollado por estudiantes

- Dispositivo flexible y económico
- Medición de parámetros de calidad del aire

- Ayuda a reconocer la contaminación causada por el tráfico
- Proporciona datos importantes para la protección del ambiente

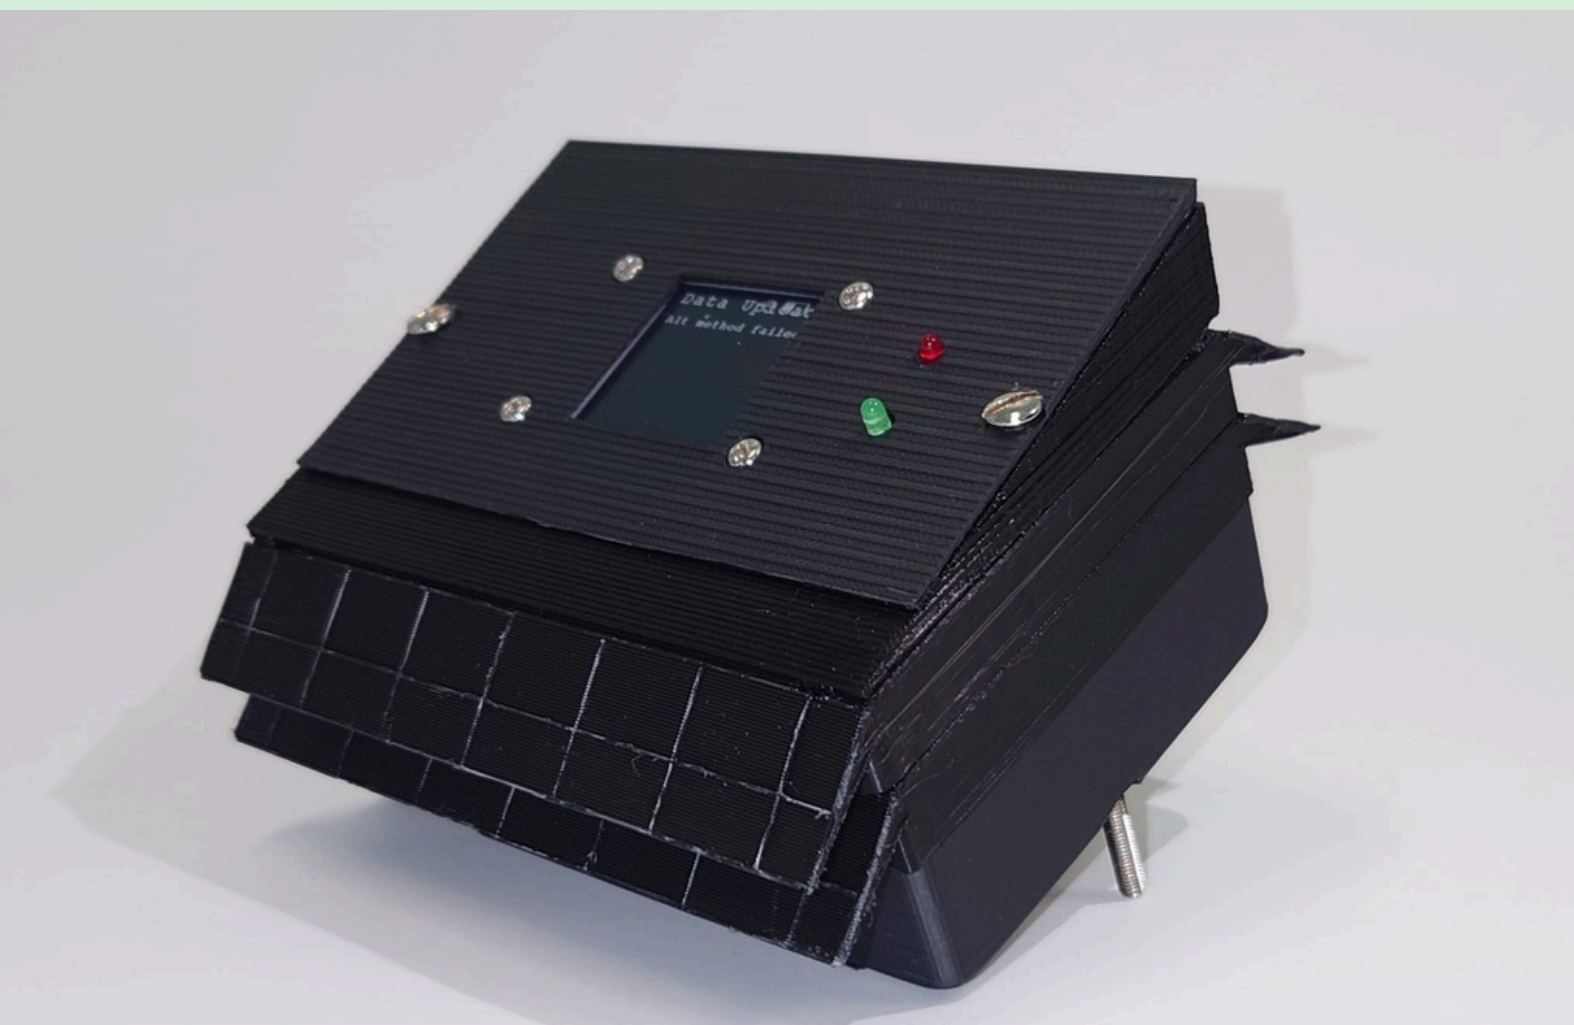

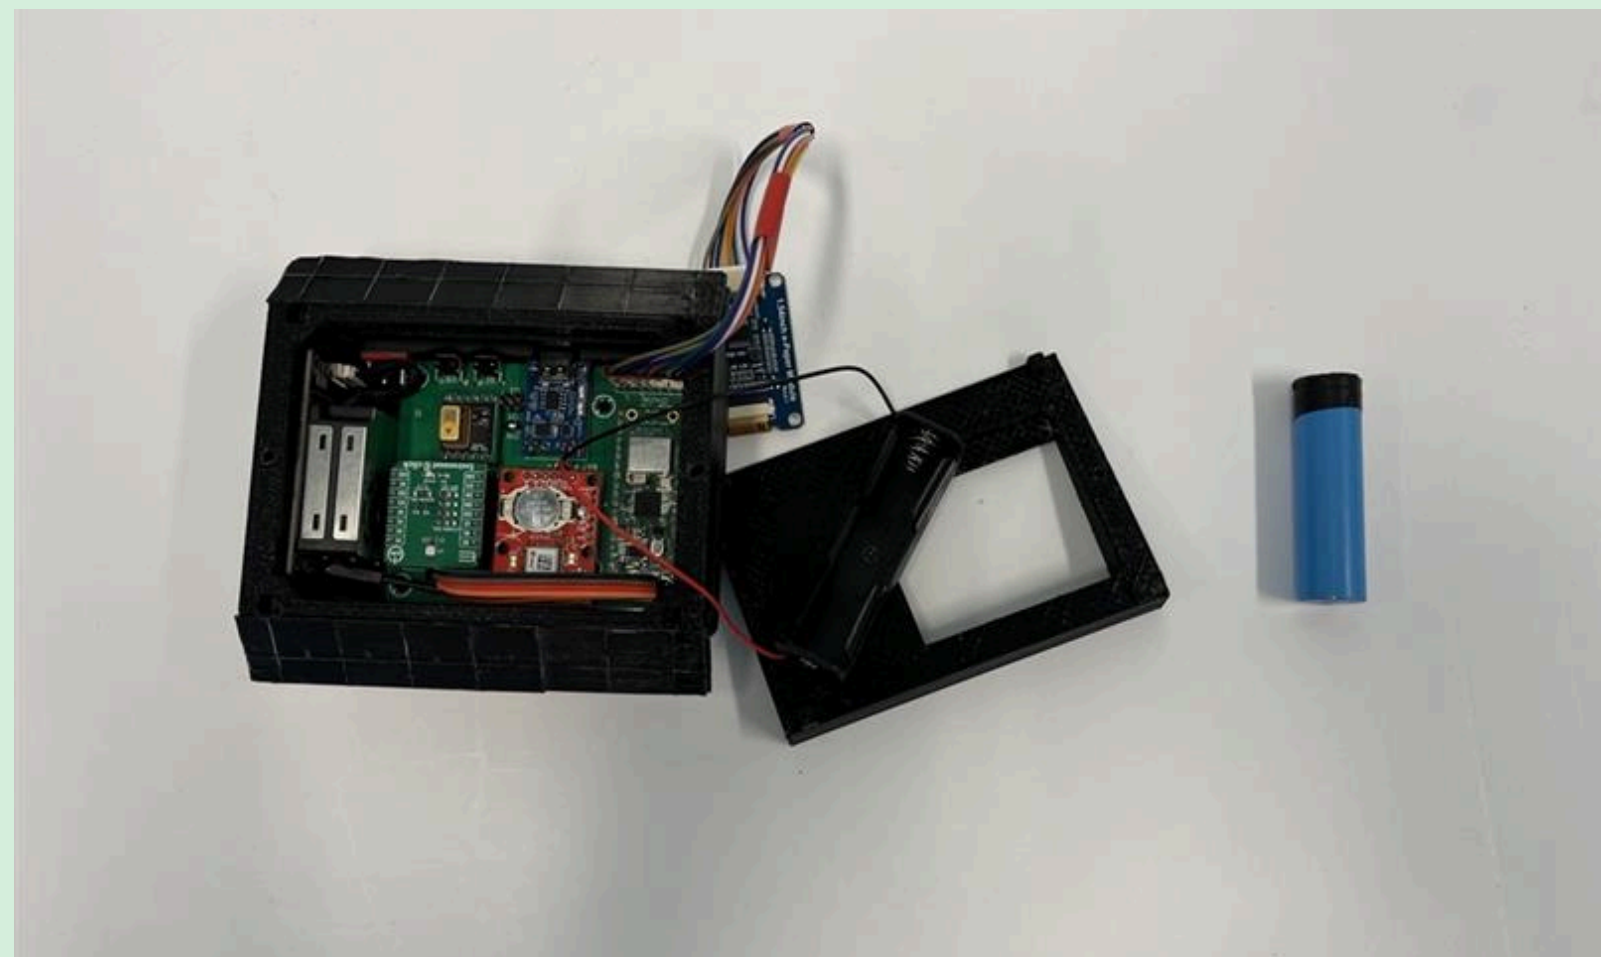

Co-funded by
